

# ZYTRONIC

The world at your finger tips

CLIENT:

LOCATION:

Australia

MARKET SECTOR:

TECHNOLOGY:

**ZyBrid™** Multi Touch

WHAT WE DID:

Australian-based JEA Technologies - distribution partner to Suzo-Happ - chose Zytronic to provide advanced rugged touch-sensor solutions for their Interactive Pro table.

With a 42-inch display, and high performance ZXY200 touch controller, these large format touch tables are ideal for retail and leisure environments.

The User Interface allows sports fans to watch live games as well as view web pages. Thanks to multiple screen configurations and multi touch screen technology, up to 4 separate TV signals can be received or websites accessed at the same time.

The touch sensors can detect multiple finger touches through the screen's 6mm-thick glass overlay. Zytronic's inherently robust multi-touch PCT solution supports up to 40 simultaneous touch points and the sensors are virtually invulnerable to many forms of harm or interference, including impacts, surface damage and spillages.

WHAT THEY SAID:

Zytronic's PCT was the only multi-touch technology capable of giving us the bezel-free aesthetic we required... The touch screen solutions we looked at from other suppliers simply proved to be inadequate...

Geoff McDowell  
Managing Director,  
APA Suzo-Happ Group
