## Zytronic Displays Limited: Statement Regarding Covid-19

At Zytronic we take the welfare of our staff, clients, suppliers and partners very seriously and, naturally, we have been monitoring the rapidly changing situation regarding the global and national spread of Coronavirus (Covid-19).

I am happy to report that at the time of writing, we have no reported cases within the business, and to let you know that as a responsible manufacturer and employer, it is Zytronic's intention to continue to operate as effectively as possible through the developing global pandemic and its effects on the UK population.

However, it is obvious that the effects of the virus itself, coupled with the actions taken by the UK and other governments, to mitigate its spread in the coming weeks and months, will inevitably impact, to varying degrees, our raw material suppliers, logistics providers, and our own employees.

Naturally we will continue to closely monitor the situation and will be reacting as appropriate to any regulatory changes in circumstances as dictated to us by the UK government. Consequently, this may result in already acknowledged dispatch dates possibly being missed and lead times on future orders placed being delayed. Should such situations arise, we will endeavour to provide information and updates as quickly as possible.

I thank you for your understanding of this situation in these difficult and unprecedented circumstances.

Best regards

Mark Cambridge

Managing Director
